About This Game

Prove your worth!

Are you worthy of entering Valhalla? You have been sent to Valheim, the 10th Norse world. Only by defeating the mighty beasts of these lands will you win the favor of the gods. This quest will take you to the far reaches of this world, from the deepest forest to the highest mountain peak. You will craft powerful weapons, build unyielding castles and sail longships towards the horizon.

Description

Valheim is a game about exploring a huge fantasy world inspired by Norse mythology and Viking culture. You start your adventure at the relatively peaceful center of Valheim. The further from the center you travel, the more challenging the world becomes. But you will also find more valuable materials that you can use to craft deadlier weapons and sturdier armor. You will also build your own Viking strongholds and outposts all over the world. Eventually you will build a mighty longship and sail the great oceans in search of exotic lands ... but be wary of sailing too far...

Features:

- Flexible house and base building system.

-
- Intuitive item crafting (weapons, armor, food etc).
 - Huge procedural world.
 - Dodge & block based combat system with a wide range of weapons.
 - Defeat bosses & collect trophies.
 - Engaging food & health system.
 - Build & sail ships.
 - Multiplayer (with focus on cooperation).
 - Dedicated server.

While some characters might assume that the death of one or two dragons is more than enough, others will recognize that there was no way Fatame could be the dragon the villagers claim is stealing ships; not only was he too small, but he was the wrong color, a mottled blue and yellow instead of black.

Those characters would be right; by the time the PCs are ready to leave, Storm has spotted their ship and circled the island at least once, waiting for them to leave.

If the PCs had left any sailors, followers, or other characters on their ship, there is a 20% chance each day the PCs are in Shipwreck Cove that they will spot Storm as she stays high in the sky or dives into the ocean and circles beneath the boat. Even if spotted, she will stay far away until the ship begins moving. Then she approaches from the direction of the sun and dives to attack the ship.
